Server Model - PowerEdge R610
Switch Model - 2960S & 3750X

System administrator with over 7 years of experience in IT Infrastructure support.
Manage and administer Windows/Linux servers, Lan/Wan networks, VMware, Desktops,
Switches and Firewalls.

The nature of my current job is providing internal IT support.
It includes multiple level supports.
Handling incidents related to Server, Desktops & LAN/WAN connectivities.

Primary responsibilities are...
Installing and configuring Windows Servers, Linux servers & Desktops.
Managing and administering VMware, AD, DNS, DHCP, LAN/WAN Networks, Apache, Ansible,
Nagios, Exchange server 2013, SCCM & MDT.
Monitoring the performance of Servers & Networks.
Check and verify that the server backup completed successfully.

Additional responsibilities have to provide IT support to all users in my office.
Troubleshoot & resolve problems reported by users.
Resolve issues related to Operating System, Outlook mails, network connectivities.
Provide required support to application development team for setting up their work
environments.
Asset Management, Documenting Server/Network configurations and Change management
process.
